Description

The **MCS32N ISO Container Skate Assembly Kit** is designed for safely moving standard ISO shipping containers and other heavy loads where forklifts or cranes are impractical. Ideal for transporting shipping containers, industrial machinery, prefabricated concrete structures and other oversized loads, this complete container moving system provides smooth, controlled movement on suitable hard, level surfaces.

Featuring a secure twist lock system, low fitting height and heavy-duty nylon rollers, the MCS32N container skate assembly provides excellent stability and manoeuvrability. The double roller steering design helps reduce rolling resistance, making large containers and heavy loads easier

to move, steer and position.

Features

- Complete ISO container skate assembly kit supplied as pictured
- 32 tonne total capacity (16T front skate and 16T rear skate)
- Twist lock system securely locks the container to the skate assembly
- Designed for ISO shipping containers and heavy industrial loads
- Low 160mm fitting height for easier container loading
- Double roller steering design reduces friction for smoother movement
- Steering handle allows controlled direction changes
- Ideal for moving containers where forklifts cannot operate
- Suitable for industrial machinery, shipping containers and oversized loads
- Heavy-duty nylon rollers provide smooth movement on concrete surfaces
- Optional polyurethane wheels available upon request
- Maximum steering angle: 45° left and 45° right

Turning Circle

- 20ft container – approximately 6m radius
- 40ft container – approximately 10m radius

Specifications

Model: MCS32N

Specification	Front Skate	Rear Skate
Capacity	16T	16T
Steering	Fixed	Steering
Number of Rollers	16	16
Castor Size	85 × 90mm	85 × 90mm
Overall Dimensions	2850 × 1030 × 160mm	2500 × 300 × 600mm
Net Weight	160kg	70kg
Fitting Height	160mm	160mm
Width of Track & Connecting Rod	–	2260mm
Cassette Dimensions (L × W)	800 × 570mm	–

Applications

Suitable for moving:

- ISO shipping containers
- 20ft and 40ft containers
- Industrial machinery
- Heavy plant and equipment
- Prefabricated concrete structures
- Oversized industrial loads

Important Information

This container skate assembly is designed for use on suitable hard, level surfaces only.

Please Note: Shipping container in images are not included. Images are for illustration purposes only to demonstrate the container skate system in use.
