Description

Industrial Fixed Load Skate designed for moving **heavy machinery, equipment and other large loads** across suitable surfaces. The SF25 is ideal for workshops, factories, warehouses and industrial applications where heavy objects need to be repositioned.

This **maintenance-free load skate** is fitted with a handle for easy carrying and positioning. A suitable **roller crowbar or jack can be used to lift the load**, allowing the skate to be positioned underneath.

The platform features a **rubber surface** to help improve stability and protect the item being moved. **Large-diameter sealed nylon rollers** provide smooth movement while spreading the load to help reduce **high point loading** and minimise the risk of floor damage.

Features

- **2500kg / 2.5 tonne capacity**
- Maintenance-free design
- Handle for easy carrying and positioning
- Can be positioned using a roller crowbar or suitable jack
- Rubber-covered platform helps improve load stability
- 2 large-diameter sealed nylon rollers
- Rollers help distribute loads and reduce high point loading
- Suitable for moving heavy machinery and equipment
