Description

Industrial Fixed Load Skate designed for moving **heavy machinery, equipment and other large loads** across suitable surfaces. The SF60 is ideal for workshops, factories, warehouses and industrial applications where heavy objects need to be repositioned.

This **maintenance-free load skate** is fitted with a handle for easy carrying and positioning. A suitable **roller crowbar or jack can be used to lift the load**, allowing the skate to be positioned underneath.

The platform features a **rubber surface** to help improve stability and protect the item being moved. **Large-diameter sealed nylon rollers** provide smooth movement while spreading the load to help reduce **high point loading** and minimise the risk of floor damage.

Features

- **6000kg / 6 tonne capacity**
- Maintenance-free design
- Handle for easy carrying and positioning
- Can be positioned using a roller crowbar or suitable jack
- Rubber-covered platform helps improve load stability
- 6 large-diameter sealed nylon rollers
- Rollers help distribute loads and reduce high point loading
- Suitable for moving heavy machinery and equipment

Specifications

Model	SF60
Capacity	6000kg / 6 Tonne
Number of Rollers	6
Height From Ground to Top	100mm
Dimensions (L x W x H)	415 x 215 x 100mm
Weight	12kg
