Description

The MWCRP-10TLP 10T Container Skate is designed for moving and positioning shipping containers and other heavy industrial loads. With an interchangeable top, the skate can be configured with either a **twist-lock top for compatible container corner fittings** or a **250mm rotating turn plate** for general heavy-load movement.

The 360° swivel wheel design provides controlled multi-directional movement, while the attachable handle allows easier guidance and positioning. Built for industrial use, the MWCRP-10TLP is suited to **shipping, logistics, warehousing, factories and container handling applications**.

Features

- **10 tonne (10,000kg) capacity**
- **Interchangeable top** – twist-lock top or 250mm rotating turn plate
- **360° swivel wheels** for multi-directional movement
- Attachable handle for easier steering and positioning
- Heavy-duty construction for industrial applications
- Suitable for moving **shipping containers, machinery and heavy equipment**
- Designed for controlled movement and precise positioning
- Suitable for indoor and outdoor use on appropriate concrete surfaces
