Description

The MCTA-12 Industrial Load Skate with Turntable is designed for moving and positioning heavy machinery, equipment and other industrial loads up to 18 tonnes. The turntable allows controlled load positioning and manoeuvring, while the maintenance-free design and carrying handles make the skate practical for regular industrial use.

Loads can be positioned using a **roller crowbar or jack**, allowing the skate to be placed under suitable loads before movement.

Features

- 18 tonne (18,000kg) capacity

- **Turntable** for load positioning and manoeuvring
- **12 rollers** for smooth load movement
- Maintenance-free design
- Fitted with handles for easier carrying and positioning
- Suitable for moving heavy machinery, industrial equipment and other loads
- Can be positioned using a **roller crowbar or jack**
