Description

The ST60 Industrial Steerable Load Skate is designed for moving and positioning heavy machinery, equipment and other loads. Its steerable design features a 1m draw-bar and swivelling platform, allowing controlled movement around bends, while large-diameter sealed nylon rollers help distribute the load and reduce concentrated floor loading.

The maintenance-free design includes handles for easier carrying and positioning, while the rubber-covered platform helps improve load stability and protect the load during movement.

Features

- **6 tonne (6000kg) capacity**
- **1m draw-bar** for controlled steering
- Swivelling platform on a thrust bearing for movement around bends
- 8 large-diameter **sealed nylon rollers**
- Rubber-covered platform helps improve load stability
- Helps distribute load weight and reduce concentrated floor loading
- Maintenance-free design
- Fitted with handles for easier carrying and positioning
- Loads can be positioned using a **roller crowbar or jack**
- Suitable for workshops, warehouses, factories and industrial environments
