Description

The MWCRP-5C Industrial Load Skate is designed for moving and positioning machinery, industrial equipment and other heavy loads up to 4000kg. With 360° rotating rollers and a swivel top plate, it provides controlled movement and easier positioning of heavy equipment.

The removable **1080mm connecting handle** provides additional control during manoeuvring, while integrated carrying handles make the skate easier to lift and position. The maintenance-free design makes it suitable for regular use in workshops, warehouses, factories and industrial

environments.

Loads can be positioned using a **roller crowbar or jack**, allowing the skate to be placed underneath suitable loads before moving.

Features

- **4 tonne (4000kg) load capacity**
- **5 heavy-duty rollers**
- **360° rotating swivel top plate**
- Removable **1080mm connecting handle**
- Maintenance-free design
- Integrated carrying handles for easier positioning
- Suitable for moving machinery and heavy equipment
- Can be positioned using a roller crowbar or jack

Specifications

- **Model:** MWCRP-5C
- **Capacity:** 4000kg / 4 tonne
- **Number of Rollers:** 5
- **Roller Size:** 80 x 70mm
- **Plate Thickness:** 20mm
- **Rotating Round Plate:** 220mm
- **Dimensions (L x W x H):** 588 x 547 x 140mm
- **Weight:** 35kg
